3D Systems to Host Investor Event

- Includes Invitation to 3DS NYC Creative Center -

Rock Hill, South Carolina – May 23, 2013 – 3D Systems Corporation (NYSE:DDD) announced today that it plans to hold an analyst and investor meeting on Monday, June 17, 2013, at 10:00 a.m. EDT at the W Hotel Union Square in New York, NY. 3D Systems' senior management will review the company's strategic initiatives, operating highlights and financial progress, and will provide an update on its product and market development plans, followed by a question and answer session.

The investor presentation will be led by Avi Reichental, President and Chief Executive Officer. The event will feature comprehensive presentations by key members of the company's senior management team that will be webcast live. After the presentation, the company also plans to extend an invitation to visit its New York City creative center which will showcase its 3D content-to-print solutions.

Investor Event Registration:

Advance registration is required for the event and space may be limited. To register, use the online registration link available under the <u>Investor Relations</u> section of 3D Systems' web site, or go directly to the registration page by clicking on or pasting the following link in your web browser:

http://investor.3dsystems.com/2013 investor and analyst day.

For remote participants, a live audio webcast of the analyst and investor day presentations will be available on 3D Systems' web site under <u>Investor Relations</u>. Participants are encouraged to visit the web site a few minutes before the start to register for the webcast and to download any necessary software.

About 3D Systems Corporation

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials and on-demand custom parts services for professionals and consumers alike. The company also provides CAD, reverse engineering and inspection software tools and consumer 3D printers, apps and services. Its expertly integrated solutions replace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, create, communicate, prototype or produce real parts, empowering customers to create and make with confidence.
