3D Systems Launches Cubify Sculpt

- The Simplest, Most Powerful And Intuitive 3D Sculpting Tool
- Creates Instant Printables For At-Home Or Cloud Printing

ROCK HILL, South Carolina –August 14, 2013 – [3D Systems](#) (NYSE:DDD)

announced today the immediate availability of [Cubify® Sculpt](#), a powerful virtual clay sculpting tool that transforms 3D modeling from a complex, skills-centric design experience to a simple, intuitive sculpting delight for everyone. Cubify Sculpt, powered by 3D Systems' volumetric CAD engine, is ideal for the freeforming of organic shapes with ready-to-print output. Cubify Sculpt comes with a 14-day free trial, is priced at \$129 and available now on [Cubify](#).

Cubify Sculpt packs a powerful feature set that includes embossing with textures, adding color with paint for full color 3D printing, intuitive push and pull tools to sculpt in virtual clay and accurate symmetry settings for designing organic shapes. The mash up feature empowers users to import multiple designs to create larger and more complex objects. Cubify Sculpt designs are 3D print-ready for at-home printing or cloud printing

with materials like Cubify Ceramix and Cubify Colorstone. Cubify Sculpt accepts STL, OBJ and PLY file formats. 3D Systems plans to fully integrate Cubify Sculpt into its expanding Cubify platform and to its award winning Cube and CubeX 3D printer experiences with direct plugins.

“Cubify Sculpt shifts the 3D modeling tools paradigm, making design for instant 3D printing something everyone can do,” said Rajeev Kulkarni, Vice President & General Manager Consumer Products for 3D Systems, “Our new virtual sculpting experience sets the stage for mainstream users to create and make everyday useful and impactful printables.”

About 3D Systems

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials and on-demand custom parts services for professionals and consumers alike. The company also provides CAD, reverse engineering and inspection software tools and consumer 3D printers, apps and services. Its expertly integrated solutions replace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, create, communicate, prototype or produce real parts, empowering customers to manufacture the future.
