3D Systems' End-to-End Workflow

Whether you need help with design, prototyping, manufacturing, or all three, 3D Systems' end-to-end workflow gives you access to the talent and technology you need to make your idea a reality.

Access to end-to-end solutions across hardware, software and services keeps your project moving forward seamlessly.

### DIGITIZE
Design up to 80% faster with reverse engineering

DESIGN
Create custom and complex geometries with 3D design

SIMULATE
Identify and address areas for improvement

MANUFACTURE
Gain access to full service manufacturing using additive and subtractive technologies

INSPECT
Ensure results match expectations with non-destructive metrology and inspection

MANAGE
Maintain visibility into print job status, material levels, preventative maintenance opportunities and more

For projects of any scope, at any stage

An end-to-end design and manufacturing workflow offers the ability to transform an idea. The outcome can be anything from a digital file, to a rapid prototype, to a fully realized final product.

INCREASE PRODUCTIVITY
- ✓ Achieve manufacturable designs in a fraction of the time
- ✓ Quickly evaluate and update designs
- ✓ Secure approvals faster

IMPROVE COST-EFFICIENCY
- ✓ Lower part weight and material use while maintaining structural integrity
- ✓ Eliminate assembly through design and manufacturing innovation
- ✓ Design parts for function rather than manufacturing process for better performance overall
- ✓ Opt for lower-cost materials without sacrificing performance

ADVANCE MARKET POSITION
- ✓ Increase cost-efficiency of development and production
- ✓ Faster time to market to beat competition
- ✓ Consult with additive manufacturing industry leaders to maximize innovation
- ✓ Supplement in-house capabilities with On Demand Manufacturing for rapid prototypes or as a bridge to production

The one roof advantage

Why is it important for you to be able to address any manufacturing issue with a single vendor?

GLOBAL SUPPORT & SERVICES

66 LOCATIONS WORLDWIDE

OVER 30 YEARS LEADING THE INDUSTRY

EXPERTISE
When you have a global team of multi-disciplinary experts on your side, you have innovation on speed dial

TIME & COST
Accessing talent and technology resources across design and manufacturing lowers vendor costs and speeds timelines for more streamlined, cost-effective results

COMMUNICATION
Consulting with dynamic professionals who can adapt their services to your evolving needs is a valuable time saver
