JOB DESCRIPTION

We are looking for an experienced Software Developer in order to strengthen the R&D team in Leuven.

The R&D team creates new 3D metal printing concepts and technologies. Software plays a significant role in further advancing the machines, as well as the data processing and process monitoring tools.

You are a Software Developer and responsible for the software in these innovations.

RESPONSIBILITIES

- You develop and program machine control software for 3D metal printers and develop software for process monitoring systems
- You are responsible for various cross-functional software tasks related to advanced technology development projects
- You cooperate with project managers and other colleagues in joint development actions using agile practices
- You test and validate software via automated software testing or directly on the 3D printers
- Furthermore, you document your own software investigations

PROFILE

- Bachelor's/Master's Degree in informatics, computer science, engineering, or a comparable qualification in software/programming
- Proven track record in software development, preferably in the field of machine controls, with different levels of responsibility (e.g. project lead/member)
- Good experience with object oriented frameworks/languages like .NET and C#
- Experience developing User Interfaces is a plus
- Full proficiency in English, knowledge of Dutch or French is beneficial
- Strong team player skills, eagerness to learn and ability to work autonomously complete your profile

WE OFFER

- A challenging job in a young and dynamic team
- A competitive salary and additional non-statutory benefits
- Career opportunities in a global company with growth opportunities
